Connection Windows 7 to SUNY Plattsburgh's Secure Wireless

1. Click on the Internet Access icon in the Windows Taskbar. (It looks like a series of signal bars with a yellow spot on them):
If you are unable to find this icon in your system tray, skip down to step 7

2. Click “SUNY-Plattsburgh”
3. Click “Connect” (make sure “Connect automatically” is checked)
4. Log in with your SUNY network id and password.

5. When prompted to “Connect” click connect. This warning is because the secure certificate can't be validated due to the uninitiated network connection. You will only have to do this one time.

6. You are now configured to use the SUNY-Plattsburgh secure wireless system.

7. If you are unable to find the icon mentioned in step one, follow the following steps. Click on the Windows start button.
and select “Control Panel”.
8. Select “Network and Internet”
9. Click “Network and Sharing Center”
10. Click “Connect to a network”. Proceed to step 2.
